GLASS PROFILES

Among all the different kinds of glasses available, one ought to choose the best glass, consisting of Heat Reduction, Sound Reduction & Safety. Our windowpanes are designed to fit glasses from 4mm thickness to 30 mm.

SIGNLE GLAZED

Single Glazed windows are beautifully carved out from a single pane of glass. The pane is designed to be sized between 4mm and 12mm in thickness.

DOUBLE GLAZED

A Double Glazed Unit is crafted using the sequence of two panes of glass parted by a vacuum, air, or argon gas. The pane of glass will be sized approximately between 20mm and 30mm in thickness.

FIXTURES OF GLASS

LAMINATED GLASS

Laminated Glass comprises two or more glass permanently bonded together with one or more layers of polyvinyl butyral (PVB). It is specifically used to enhance the safety of houses. In case of breakage, the glass parts are likely to stick to the plastic (PVB) layer.

FROSTED GLASS

Frosted Glass is purposely used when privacy is a priority. It allows light to pass through without a clear view. Frosted glass is fashioned by sandblasting or acid etching float glass.
