Oyster[®]
Life Inside

ABOUT

Oyster, a brand name synonymous to excellence, reliability, creativity, and elite design, has nurtured our quality products since 2003, provides a widespread sales network, dependable customer care network, and honest commitment to our valued customers and trustworthy business partners.

Our aesthetically refined quality products are manufactured in our Ghaziabad, UP plant with full sincerity and commitment. We have carved a niche in manufacturing a wide range of wellness products like bathtubs, spas, enclosures, showers, panels, multisystem, and uPVC windows and doors. We will carry the same legacy in the years to come with our new range of products.

Oyster got its birth in 2003 and has now matured into a prominent quality brand, providing a mix and match of modernity of technology and artistic sensibilities in supplying the finest of windows and doors across India. Our creative innovation brings the likes of uPVC windows and doors in the most exquisite designs, colors, and textures.

Our artistically inventive designed uPVC windows and doors are a visual spectacle for the eyes and are appropriate to enlighten the charms of your households, offices, hospitals, hotels, restaurants, banquet halls and more.

MISSION

We at Oyster aim to delight our customers by providing innovative utility solutions for every home. uPVC or Unplasticised Polyvinylchloride being a standard material used in windows and doors, our mission is to give our customers benefits like good security, better insulation, low maintenance, ventilation, soundproof, fire retardant windows and doors.

VISION

Oyster's vision is to bedazzle the lifestyle of our customers with ecstasy, joy and happiness through our myriad designs of fabulous windows and doors. We understand the changing trends and technologies of our business and it inspires us in creating innovative products with extreme dexterity.

OYSTER FACTORY PLANT

-Ghaziabad, Uttar Pradesh

As Oyster is the leading manufacturer of wellness products in India, it manages its entire factory in the spirit of sustainability, development and continuous development.

It is not possible to create and develop innovative state-of-the-art products without a technically advanced production unit. Our production facilities have the necessary capacities and technologies to cover all market demands along with the preparation of brand new product lines.

We support development, increase productivity and motivate our employees and partners to participate in what will change the world of uPVC windows and doors in India.

LIFE INSIDE

2003 - Establishment of OYSTER

2005 - Addition of new product lines under 'wellness' category

2008 - Expansion of Factory

2010 - Crossed 300 mark dealer

2012 - Launched Brook Shower Series

2020 - Shower in new color variant launched, partnered with German company for uPVC

2021 - Launch of uPVC segment in the Indian market.

According to the expected course of action in the Indian market, our ambition is to expand Oyster and provide the best quality to our customers. uPVC windows and doors have witnessed significant growth during these years. The market has been growing majorly due to rising awareness amongst builders and consumers, rapid urbanization, growth in residential units, and increased adoption of eco-friendly and energy-conserving products. Oyster is willing to be a part of the country's needs and help to fulfill the country's demand for uPVC windows & doors.

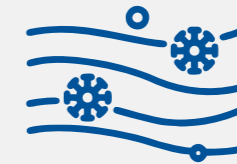

Advantages OF OYSTER uPVC WINDOWS AND DOORS

● Durable

Our artistically designed and manufactured uPVC windows are durable par comfortable, promise longer life, and are resistant to environmental and climatic effects.

● Comfortable

Our product line of uPVC windows provides an efficient ventilation system and helps to maintain the temperature. It facilitates soothing airflow into the room and is noise resistant.

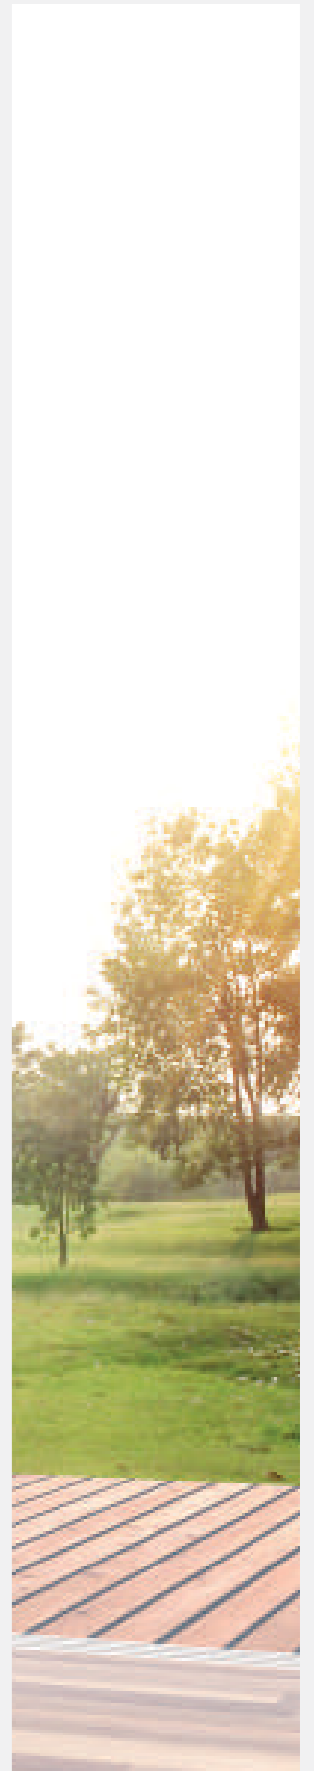

● Individual

The subdivision character depends on the choice of profile geometry ranging from the opening mechanism and windowpane subdivision to come up with a unique pattern to charm the looks of your room. Oyster is putting their best foot forward with uPVC window patterns to grace the indoors and outdoors look of your room.

● Versatile

These windows encompass diverse architectural designs with innovative and contemporary designs to gel with modern ethics. Replace your white or old-fashioned windows with a fancy window wrapped with wood-grain foil.

Innovation in Ventilation

Oyster[®]
Life Inside

We form the work for the world of windows in India

Oyster brings you exemplary unique doors and window systems! These will not just upgrade your interior's look but keep you safe from any climatic conditions. Oyster has modern uPVC systems for windows and doors.

Not All uPVC products are equal

Our latest-generation windows are not only attractive and sophisticated, but are also perfectly modelled with a number of modern smart functions to satisfy the most demanding technical and safety requirements.

OYSTER uPVC SYSTEMS

Our uPVC windows and doors are highly sophisticated to gel with the modern-day demands and developments. The latest technology has come a long way to demand sophisticated, geometrically perfect, attractive, and durable. Oyster has mastered and set up a new arena with high standard window designs to add more light with redder views.

OYSTER CADRADO

Highly elegant straight lines

The latest design and technical precision with the occurrence of complete concealment are highly recommended for contemporary or discreet design. Nowadays, Vinyl windows are the epitome of attraction to people's eyes because of their beautiful architecture.

GLASS PROFILES

Among all the different kinds of glasses available, one ought to choose the best glass, consisting of Heat Reduction, Sound Reduction & Safety. Our windowpanes are designed to fit glasses from 4mm thickness to 30 mm.

SINGLE GLAZED

Single Glazed windows are beautifully carved out from a single pane of glass. The pane is designed to be sized between 4mm and 12mm in thickness.

DOUBLE GLAZED

A Double Glazed Unit is crafted using the sequence of two panes of glass parted by a vacuum, air, or argon gas. The pane of glass will be sized approximately between 20mm and 30mm in thickness.

LAMINATED GLASS

Laminated Glass comprises two or more glass permanently bonded together with one or more layers of polyvinyl butyral (P V B). It is specifically used to enhance the safety of houses. In case of breakage, the glass parts are likely to stick to the plastic (PVB) layer.

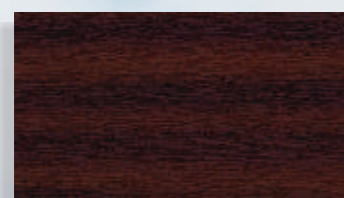

FROSTED GLASS

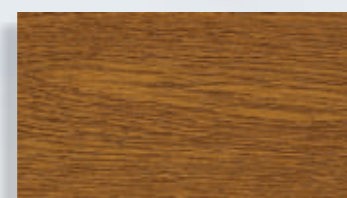

Frosted Glass is purposely used when privacy is a priority. It allows light to pass through without a clear view. Frosted glass is fashioned by sandblasting or acid etching float glass.
