REASON TO CHOOSE OYSTER SPA

Oyster offers 'Made in India' luxury bath wellness products best suited to Indian conditions

1

Oyster recognizes the evolving needs of its customers; therefore, each SPA unit is equipped with a high-grade protective cover designed to shield it from dust and pollutants while helping maintain optimal water temperature

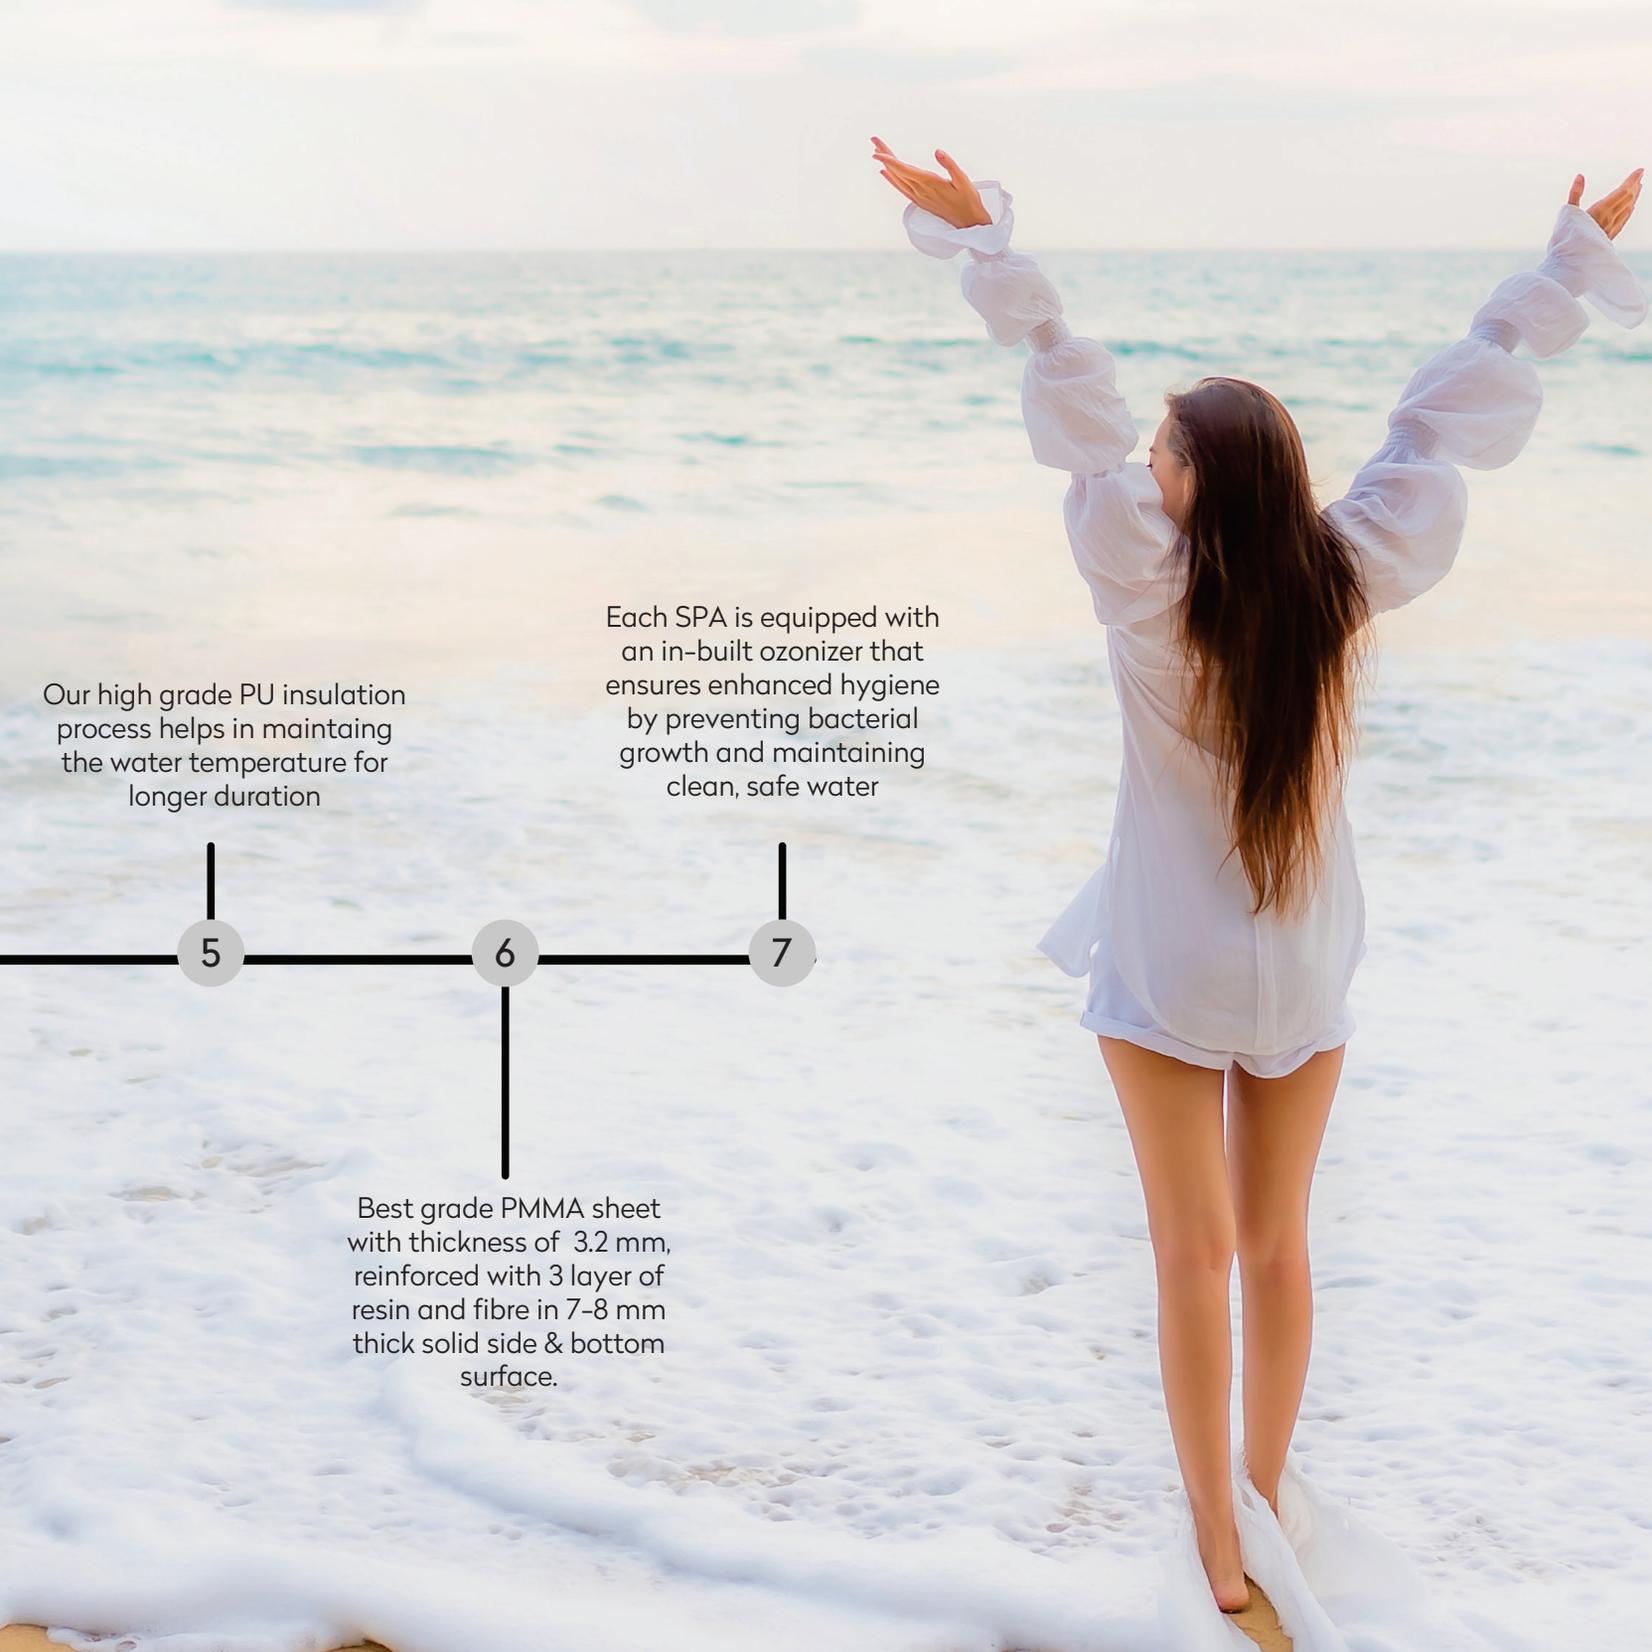

2

Oyster embodies innovation across its entire product portfolio. The SPA Pro and Pro Max series exemplify our industry-leading standards and stand as exclusive benchmarks in their category

3

Each unit is equipped with advanced electronic components from 'Balboa', USA, ensuring superior longevity, precision, and reliable performance

4

Our high grade PU insulation process helps in maintaining the water temperature for longer duration

Each SPA is equipped with an in-built ozonizer that ensures enhanced hygiene by preventing bacterial growth and maintaining clean, safe water

5

6

7

Best grade PMMA sheet with thickness of 3.2 mm, reinforced with 3 layer of resin and fibre in 7-8 mm thick solid side & bottom surface.

FOR A BLISSFUL EXPERIENCE

Our spa range brings a dynamic dimension to your everyday journey of freshness and well-being, creating a consistently serene spa environment. It combines elevated comfort with cost-efficient operation and moderate energy consumption, delivering an experience that is both indulgent and sustainable.

SUPERIOR PU INSULATION

Insulated PU significantly reduces heat loss, helping maintain water temperature for an extended period, which enhances bathing comfort and supports energy conservation. This allows users to enjoy a worry-free, tranquil SPA experience while minimizing energy usage and ongoing operating costs

PAPER FILTRATION SYSTEM

Each SPA is equipped with an advanced paper filtration system that efficiently removes impurities such as dirt and debris, ensuring that only clean, treated water is recirculated back into the SPA for safer use.

OZONIZER

Our advanced ozonizer from Balboa, USA enhances the spa experience by infusing ozone-enriched water that sterilize, disinfect and purify water . With a powerful output of 50 mg/hr, it is among the best in category.

FEATURES

Online Heater: Allows the spa to tune itself to its environment, day-to-day and season-to-season, thus reducing your heating costs

Air Massage: Using air compression technology, air jets offers perfect relaxation, recovery & Relief from physical stress

Filtration: Filtering the water continuously to keep it clean for a longer time for safe bathing & effective water conservation.

Hydromassage: Provides muscle relaxation through effectively using the hydro jets which ultimately promotes better circulation for speedy recovery.

Chromotherapy: Balancing energy using the coloured lights at different wavelengths for healing body, mind and body's energy centres.

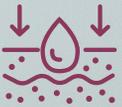

Electronic Controls: Highly efficient controls to deliver world-class performance of jets, online heater & other performance driven equipment.
